Summary

Detail oriented full-stack web developer with a passion for helping businesses find solutions to their online needs. Recently earned a web development certificate through the University of Richmond. Demonstrated ability to collaborate with teams to create dynamic web applications using mobile-first designs. Experienced group leader who has managed multiple projects simultaneously and strives to create quality applications while maintaining professional design standards.

Skills and Technologies

- React, Node, and Express
- HTML 5, CSS 3, and JavaScript
- MySQL and MongoDB
- Version control with Git
- Agile Web Development
- Responsive Design
- Postman and Jest

Projects

RCity
Live Site: https://rcity.herokuapp.com | *Github:* https://github.com/ejsmith13/city_app
RCity is an application that allows users to search for activities posted by locals in Richmond, VA. The backend is set up using Express while the frontend uses the React library. I completed this project alone and handled all the design and coding independently.

Workout Crusher
Live Site: https://ancient-river-16818.herokuapp.com | *Github:* https://github.com/ejsmith13/workout-crusher
Workout Crusher is an application that suggests new workouts for users and allows them to track their daily exercise routines. It uses MySQL and Sequelize to track and store information about workouts and suggested exercises. It uses a mobile first design with Bootstrap on the front end along with Express framework for the backend.

Experience
